

Trickle Net Round Bale Net – How to Use

Firstly, fit your Bale Net over the round bale so the rope seam sits around the top edge of the bale. Do not remove the net wrap before you do this!

Then flip the bale over so it is sitting within the net with an open top end.

Now you can remove the net wrap while the bale is sitting inside the Bale Net.

Then pull the Bale Net up around the bale, and use the draw string to pull the open end closed.

Bitless Equestrian Centre SA48 8RA

Tie the string up in a bundle and tuck it inside the netting.

TOP TIP. You may keep the bundled string in a small bag, such as a washing tablet bag.

Finally flip the bale so that the tied end sits under the hay, and the rope ring sits around the top.

When the bale is almost gone, remove the last of the hay before the tied end is exposed.

We are UK agents for [Big Bale Buddy](#)

We also sell other Trickle Net products:

- small rectangular bale net
- topper net
- large soffee hay net
- shake & graze chaff net
